About Me

Data Science student at PUCIT with strong expertise in full-stack development, AI automation, and machine learning. Experienced in building scalable web platforms, real-time systems, and intelligent applications using Next.js, Supabase, RAG pipelines, and ML models. Coursework covers supervised and unsupervised learning, regression, classification, neural networks, and classical AI applied through practical projects in financial analysis and data visualization. Passionate about creating user-centric solutions and actively contributing to university technical and media societies.

Expertise

AI & Machine Learning	RAG Systems, Scikit learn, Supervised/Unsupervised Learning, Regression, Classification, Decision Trees, Random Forest, AI API Integration
AI & Automation	n8n, Webhooks, Workflow Automation, Multi-user Bots, Prompt Engineering
Backend & Databases	Node.js, Express, Hono, Django, REST APIs, MongoDB, PostgreSQL, Supabase, SQL
Frontend & Mobile	React, Next.js 14, TypeScript, JavaScript, Capacitor
Data Science	Python, Pandas, NumPy, Data Analysis, Visualization, Power BI
Programming	Python, C++, Assembly, Java Script
Tools	Git, GitHub, Postman, VS Code, Docker, Expo

Featured Projects

- **Fast Food Pro** *Next.js 14 · React Native · Supabase · Capacitor*
White-label restaurant ecosystem with customer app (web + mobile), kitchen display, admin dashboard, and real-time order processing.
- **Money Lens** *Python · RAG · Machine Learning*
Retrieval-Augmented Generation system that processes financial documents and answers natural-language queries over statement data surfaces structured insights automatically.
- **Expensio** *Next.js · TypeScript · Supabase · PostgreSQL*
Smart expense tracker with dashboards, full CRUD transactions, budgets, categories, recurring payments, and OAuth login.
- **Stock Market Dashboard** *React · Python · API Integration*
Real-time stock tracking and interactive data visualization using live market APIs, with Python-based data processing and charting.
- **MERN Authentication Boilerplate** *MongoDB · Express · React · Node.js*
Secure, production-ready JWT authentication system with modern security practices.

All projects available at github.com/abdullah2ko5

Media & Photography

- **PUCon '24** — Media Team Member, University of the Punjab
Captured event photography and created digital media content for the flagship tech conference.
- **FCIT Media & Information Society** — Head of Production, PUCIT
Led video shoots, event production, and media campaigns.
- **TechnoVerse CUI Lahore** — Campus Ambassador, COMSATS University
Promoted the tech festival and represented the event on campus.
- **FCIT NC Sports** — Event Manager, PUCIT
Organized and managed national-level college sports competitions.

Hobbies & Interests

- **Photography** — Active mobile photographer on Instagram: [@mabdullah.dng](#)
- **Community** — Active participant in university sports management and debating societies.

Experience

Sep 2025 — Present	Teacher Assistant — Programming Fundamentals, PUCIT, Lahore Assisted students with C++ fundamentals and problem-solving techniques.
Dec 2025 — Present	Media Team Member — Pioneer Debating Society, PUCIT, Lahore
Oct 2025 — Present	Head of Production — FCIT Information and Media Society, PUCIT, Lahore
Apr 2025 — Present	Campus Ambassador — The TalentBeacon, Pakistan
Apr 2025 — Present	Campus Ambassador — TechnoVerse CUI Lahore
Mar 2025 — Present	Media Team Member — PUCon '24, University of the Punjab
Dec 2024 — Present	Event Manager — FCIT NC Sports, PUCIT, Lahore

Education

2024 — 2028 (Expected)	BS Data Science	Punjab University College of Information Technology (PUCIT), Lahore
2022 — 2024	Intermediate in ICS	Government Postgraduate College, Vehari (1012/1200)
2020 — 2022	Matriculation in Science	Govt Islamia High School, Vehari (1051/1100)

Certificates

- Relational Databases & SQL: Complete Guide for Developers
- Mastering React Fundamentals: The Complete Beginner's Course
- MERN Stack: All You Need to Know with Practical Project

Open to full-stack development, AI/ML engineering, automation, and data science opportunities.
